# 二年級英文常識課程

2. Look carefully at the picture on page 7. What are the people doing? Why do they do these activities at night?
3. Some people need to work at night. Why is their work important to us?

## Note

Most people work during the \_\_\_\_\_ and rest at \_\_\_\_\_.

## 3 How do science and technology help people do night-time activities?

1. How would our lives be without electricity at night?
2. Read the story about Thomas Edison and answer the questions.

A long time ago, people used oil lamps and candles for lighting. The light was weak, so they could not do many things at night.

When light bulbs were first invented, they broke easily and went off quickly. Thomas Edison wanted to solve this problem. After testing more than 6000 kinds of materials, he improved the design and made a light bulb that stayed on much longer. As a result, more and more people started using light bulbs.

- (1) How did Edison's discovery make our daily lives easier?
- (2) What can you learn from him?
3. What lights are not needed in the picture on page 7? Why is it bad to keep them on?

## 4 What should we do late at night?

1. When do you usually go to bed at night?
2. What are these children doing late at night? Are they right? Put a ✓ or ✗ in the ○ and explain why.

## 5 What do some animals do at night?

1. What animals are active at night?
2. These animals look for food at night. What do their eyes have in common? How do their eyes help them?

We should treasure our time at night. Plan your rest and activities well.

PowerPoint

## 3. Why can bats fly safely at night? Read and find out.

Bats come out at night.

Most bats make sounds when they fly. The sounds reflect back to them, so they can tell how far away the nearby objects are.

Some bats have good eyesight. They do not need to listen to reflected sounds when they fly.

## Summary

- ◀ In general, a day is divided into daytime and night-time.
- ◀ During the daytime, we can see the sun. The sky is bright. It is good for people to work.
- ◀ During the night-time, we can see the moon and the stars. The sky is dark. It is good for people to rest at night, but some people need to work. At night, some animals also come out to look for food.
